

New studios in Canning Town

10 new studios have been created following a two year collaboration between ACAVA and Look Ahead Housing and Care. The registered social landlord has undertaken a major refurbishment of an old seaman's mission at Canning Town in the London Borough of Newham to provide social housing accommodation for key workers and adults with mental health support needs or learning disabilities.

Working in partnership with ACAVA it has incorporated 10 purpose designed studios. With an established record of delivering a quality arts programme as an integral part of its support and care work to help vulnerable people, LAHC sought a studio provider as a partner in further developing this support.
