

Exhibition Seasons at Maxilla Space

Ana Carolina Rodrigues, Christopher Taylor, and Krister Klassman are proud to present a new four-part annual project Seasons, at Maxilla Space.

At the moment of each equinox the Earth's axis is perpendicular to the Sun's rays. On any other day of the year, either the Northern Hemisphere or the Southern Hemisphere is increasingly closer to the sun. The angle of the earth's axis is what gives us our seasons, it is what brings about change.

Seasons will launch with a weekend-long exhibition opening on Thursday the 23rd of March. The week when the sun crosses the celestial equator, when day and night are of equal length. This marks the arrival of spring and is an occasion to celebrate.
