

International Social Prescribing Day returns on 18 March

This week we celebrate Social Prescribing Day and all the projects set up by ACAVA and other organisations to maintain the health of our communities during the Covid-19 pandemic.

Social Prescribing Day is happening on 18 March and is an event aiming to foster an attitudinal change, to shift the power to the people and local communities, to forge cross-sectoral collaboration, to promote co-design and co-creation, and to ensure social prescribing continues to grow as a grassroots movement.
